

Magnetic Sweeper- High Strength Permanent Magnet.

Magnetic sweeper is a tool or machine that helps in the collection of ferrous waste or debris magnetic sweeper also called magnetic broom which is helpful for quick clearing areas having dangerous ferrous scrap metals such as iron chips, nuts, screws, wire, and staples etc. It reduces time spent clearing shop floors areas and the costs associated with repairing punctures and other damage to vehicles and plant machinery. Using Magnetic Sweepers is a convenient, safe and time saving way to clean floors, walkways, driveways, construction areas, factory loading docks, airports packing lots and many more. In fact, anywhere that damaging and dangerous ferrous debris is present. We have been designing and manufacturing magnetic tools for various industry and applications.

How to Clean

Magnetic Sweeper can be cleaned in seconds by simply pushing button given in its handle for self-cleaning, the attracted contamination will fall into the dust bin or scrap yard.

Applications

Suitable application for magnetic sweeper Clean floors, Walkways, Driveways, Construction areas, Factory loading docks, Airports, Packing lots and many more. In fact, anywhere that damaging and dangerous ferrous debris is present.

Benefits :

- Simple to use.
- Easy to clean.
- Available in various sizes
- Removes all sized contaminations.
- Using High Strength permanent magnet
- Long life equipment
- Light weight
- Long Holding rods
- Durable wheels
- High Lifting capacity

Technical Details.

- Total Length: 812 MM
- Total Width: 330 MM
- Wheels Dimensions: 100 MM
- Ground Clearance: 32 MM
- Width Of magnetic Area: 310 MM
- Lifting Capacity: 750 GM
- Magnetic Strength: 2500 Gauss
- Cleaning Type: Self Cleaning
